A few more things...

1. Be prepared to include a description of your home. Be sure to describe any unusual features, positive community attributes, and updating that has been done to the home. You also may want to include information about your area.
2. Even though we only require one type of contact information, we recommend providing both a contact phone number and an email address. Some home buyers will ONLY call, others will ONLY email.
3. After entering the listing on MHVillage, you will have the opportunity to upload digital photos of your home. This is a very important part of your listing - buyers are more likely to view your listing if it has photos with it. If you do not have a digital camera, photos can be mailed to MHVillage. We will scan the photos and upload them into your listing.

Remember, with MHVillage your listing can be modified at any time. Change the price, photos, home description or anything else as you see fit. To make changes, log into your account and click the "View/Change Listing" link.
